# BOMMERSBACH IRISES

## How to Grow Irises

Have good average garden soil to which is added a little bone meal. Plant rhizome one inch deep and firm down top soil. Do not allow water to stand on Irises summer or winter. Use crushed limestone early in March and September as Irises like lime. Be sure to cultivate and cultivate.

Irises do better planted in plenty of sunshine, and divide every four years. Plant them in masses as the colors show up better.

July is the best time to replant Irises.

I ship them any day from March to December, except the newer varieties which go forward during July and August.

This list of Irises are the best of the old standard varieties and are far better and healthier than lots of the new ones. Have added a few of the newer varieties that are extra good and beautiful. Prices are within reach of all.

No guarantee, expressed or implied, is made that stock will grow. Have no control over after treatment or weather conditions. The purchaser assumes all risks after stock leaves our nurseries in good condition.

All plants are of our own growing.

Have growing many varieties not listed. If interested, write and I may have what you need, and at attractive prices.

**ALL ORDERS ARE PREPAID ANYWHERE IN THE UNITED STATES.** No order for less than \$1.00. Send check, draft, or money order.

The best way to select Irises is to see them in bloom on the plant. You are always welcome to come and see them. All plants are strong and vigorous and true to name. The figures before the varieties give the garden ratings by the American Iris Society.

Any 25 cent Iris will be sold at 50 cents for 3; \$1.00 per dozen.

Any 50 cent Iris will be sold at \$1.00 for 3; \$2.00 per dozen.

Any 75 cent Iris will be sold at \$1.50 for 3; \$3.00 per dozen.

Any \$1.00 Iris will be sold at \$2.00 for 3; \$4.00 per dozen.

**A State of Illinois Inspection Certificate Is on Every Shipment.**

# BOMMERSBACH PEONIES

## *How to Grow Peonies*

Plant Peony roots in average garden soil. Plant three feet apart each way.

Plant with the top eye or bud two inches below the surface.

Plant for the future.

Use only bone meal and wood ashes on the surface.

Keep all kinds of manure from the roots.

Firm the surface soil and cover with straw, six inches deep, the first winter.

Plant in full sunshine and in well-drained soil.

When cutting for blooms, leave some leaves on stalk.

Peonies are three to five eyes, standard divisions, healthy and true to name.

Divisions are from three-year-old plants.

I grow my own Peonies. Delivery begins August 15 to December.

No spring shipment.

Ratings are by the American Peony Society.

Orders are shipped prepaid, anywhere in the United States. No order for less than \$1.00. Send check or draft.

This list contains the best varieties.

Peonies at 10 times each price by the dozen.

It takes a peony root three years to overcome transplanting, so do not expect too much at first.

Be sure to cultivate and cultivate.
